

MS Track[®] Web

Cut costs, enhance revenue and manage risk, right from your desktop

MS Track Web is our Scaled down easy to use Fleet Management and Tracking Solution, delivered via the Worldwide Web.

Designed for smaller vehicle fleets, or for customers who require separate access from MS Track Pro, MS Track Web gives you all the information you require to take control of your vehicles without the need for any software to be installed.

Reduce Cost:

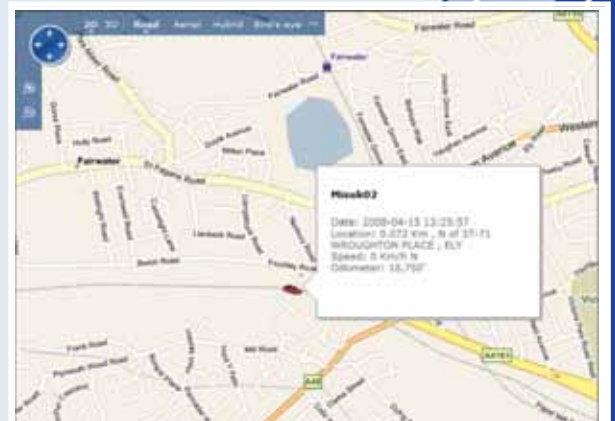

- Maximise fleet visibility – know where vehicles are at any time
- Fuel – non-business miles, after-hours driving, excess idling and more
- Reduce maintenance costs
- Reduce unjustified overtime claims
- Align reported fuel costs with actual mileage
- Simplified regulatory compliance

Enhance Revenue:

- Maximise revenue opportunities from existing logistics capacity
- Improved productivity through route planning and optimisation
- Capture under-billed or non-billed service calls
- Rapid response to emerging business opportunities
- Accurate ETAs and enhanced on-time delivery performance
- Eliminate misuse of company owned assets and inventory

Manage Risk:

- Improved driver accountability and behaviour
- Ensure vehicles remain in approved operating areas, out of denied areas
- Eliminate excessive speeding
- Identify top performers and reward performance
- Keep vehicles and cargo secure throughout fleet
- Emergency reporting, monitoring and messaging
- Reduce theft and liability

Key Features

Totally Online - With MS Track Web there is no special software to install, everything you could need for Managing a Small Fleet can be accessed anytime from any internet enabled PC

Real Time Vehicle Locations - GPS based location information is transmitted wirelessly in real time via GPRS. Units can also be polled to provide an instant location of a vehicle, helping to cut the amount of calls to drivers to find their location or ETA.

European Street Level Mapping - MS Track Web is compatible with a variety of mapping engines, including Microsoft MapPoint, Google Maps, MapQuest and many others.

Management Reporting - Key Management reports have been chosen from our main reporting suite in MS Track Pro, which quickly give the required information, helping to reduce time spent on administration of paper based working sheets & maintain better cost control.

Event Notification - Panic Alarms, Geofencing, Speeding, Out of Hours Usage, and Arrival at site are just some of the many Email Alerts which MS Track Web can send to Mobile Phones, Email Clients, Blackberry Devices & PDA's.
